Woden temporary bus interchange underway

Construction on a temporary public transport interchange is now underway on the block bound by Callam, Matilda and Bowes Streets in the Woden Town Centre.

The temporary bus interchange will be constructed over the existing bus layovers located to the east end of the Matilda Street carpark.

The temporary interchange will allow bus operations to continue safely while construction of the permanent light rail ready public transport interchange is underway.

The interchange will feature sheltered double platforms with prioritised pedestrian access at the northern and southern entry points including advanced CCTV and lighting.

Buses will operate from the temporary interchange from the start of ACT school term one in 2023, with the existing Woden bus interchange to remain operational until then.

A plan guiding the transition from the current interchange to the temporary interchange is currently underway. Passengers will be kept up to date when information is available through various ACT Government websites and channels before the new interchange opens. Transport Canberra will also provide help and assistance on site at the interchange.

CBR**

When complete, the new CIT Campus and precinct will be a place that welcomes students, commuters, Woden residents and visitors to the area - whether to study, use public transport, access local shops and services or meet up with others in new public plazas and green spaces.

Indicative artist impression

What does this project include?

A new purpose-built CIT campus

A new light rail ready public transport interchange, with more bus stops and passenger-friendly shelters

New bus layovers and driver facilities to support the new interchange

Better pedestrian and active travel connections

An integrated youth foyer, with up to 20 independent units and communal living spaces

Ground level retail and meeting spaces

New public places, facilities and green spaces, including public toilets and secure bike storage.

A new pedestrian boulevard linking the interchange to Woden Town Square

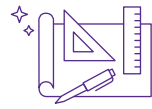

A new local shared zone between Bowes and Bradley streets

What we heard: your feedback on concept designs

Over the past few months, we've been hearing the community's feedback on the CIT building concept designs.

Here's what you told us so far:

Modern design

The community agrees modern building design and facilities proposed will boost the appeal of the Woden town centre.

Shelter

The community is looking for shelter from adverse weather when commuting from the interchange to other parts of Woden town centre and waiting at the public transport terminals.

Green spaces

The community is interested to know what kind of plants will be featured in the green spaces around the campus.

Keep up to date on ways to have your say on the project at

CIT Campus Woden early works development application open for feedback

The start of construction on the CIT campus is one step closer, with a development application submitted for early works on the project.

The package of early works includes demolition, excavation and site fencing and will take place around the current Woden transport interchange area from early 2023.

**The community can
provide feedback on this
development application at**
www.planning.act.gov.au

The main works development application is scheduled to be submitted later this year.

Women in Construction

As part of JobTrainer, SPARK in partnership with Australian Training Company, Creative Safety Initiatives, Canberra Institute of Technology, our project delivery partner Lendlease has launched the Women in Construction Program for women aged 17 and over.

The 5-week program is a combination of theory, practical hands-on learning, site tours and work preparation sessions.

Upon completion, participants can access apprenticeship and traineeship opportunities with contractors working on the future CIT Campus and the integrated transport interchange.

This program is an example of how the CIT Campus project is working to improve employment and social outcomes for women in the construction industry.

A green light for Launceston St

An east and west bound lane of Launceston Street in Woden are now reopened to traffic.

There's also a new set of lights at the intersection of Easty and Launceston Streets, this includes a designated pedestrian crossing point outside Canberra College and into Eddison Park.

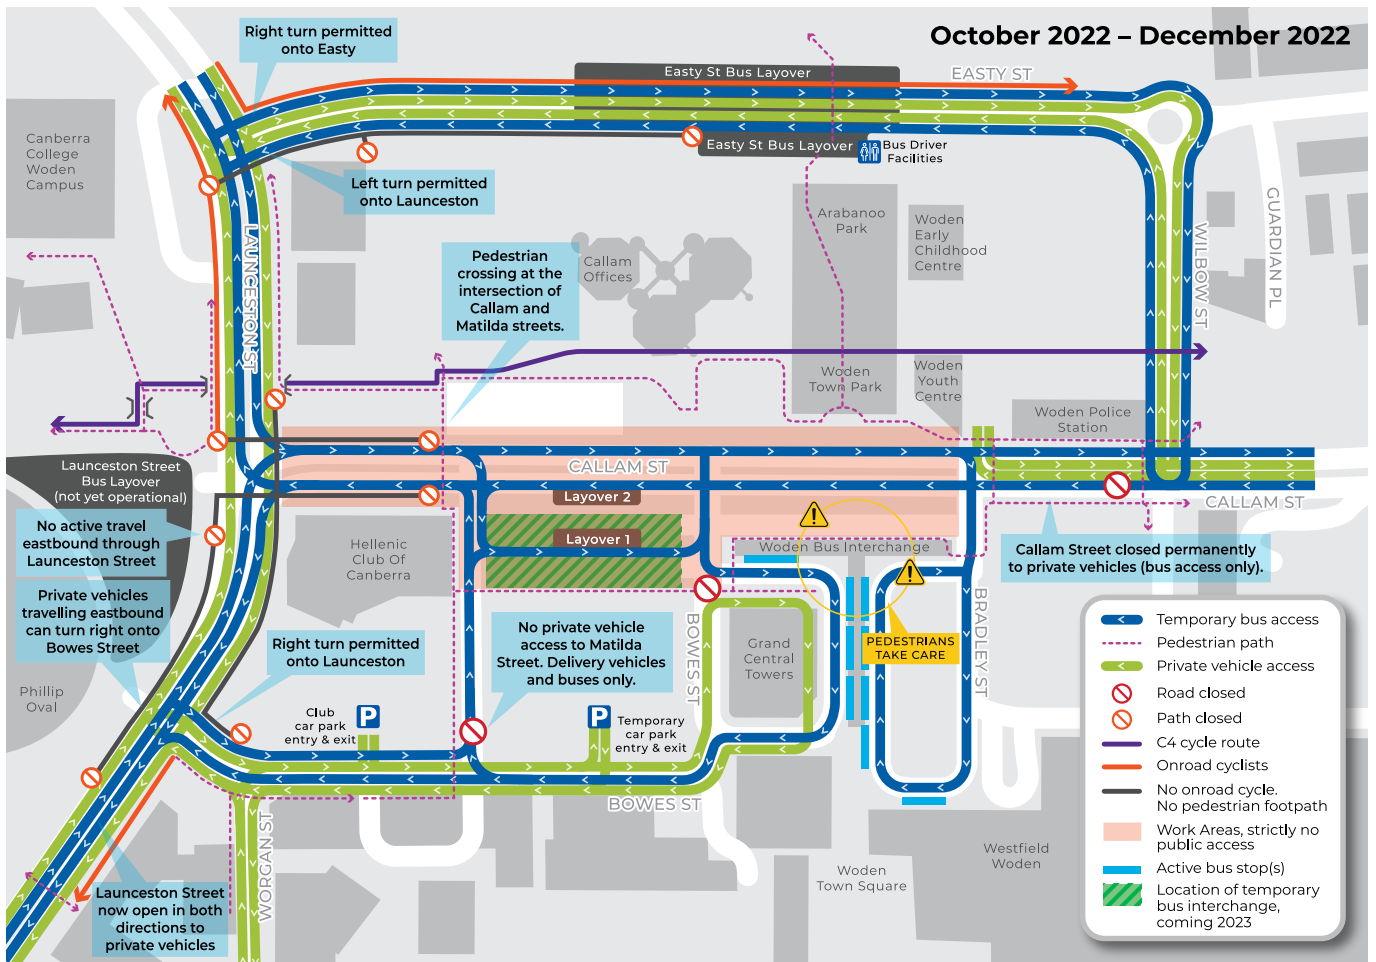

Work continues in the area around roads and verges and on the construction of two new bus layovers on Launceston Street near Phillip Oval and a smaller one on Easty Street.

If you haven't driven in the area in a while please take precautions and follow all signage.

Visit our website to sign up for construction updates on the CIT Woden campus.

Current road and access changes in the Woden Town Centre

To stay up to date on progress and changes to roadworks in the area, please visit act.gov.au/citcampuswoden or sign-up for the bi-monthly construction look ahead.
